

## The first sustainability report with the theme of "respect" from Aydem Renewables

Aydem Renewables, the affiliate of Turkey's leading integrated energy company Aydem Energy, operating in the field of renewable energy has released its first sustainability report.

In the report, where approach of 'respect' to business, environment and society is adopted, the works, which the institution has put its signature on within the scope of the vision of "Energy for Life", were introduced.

Aydem Renewables which possesses the 3rd largest portfolio in the renewable energy production of Turkey, has published its first sustainability report that includes the works it has performed for the future of the society, with its 'sustainable', 'innovative' and 'people-oriented' approach.

In the report, where the theme of "respect" to human life, environment and society is treated, the activities conducted and the works performed for a more sustainable world, with the responsibility undertaken in line with the 25-years of strong background of the company, have been introduced.

Aydem Renewables, which has made its sustainability strategy compatible with the common agenda of the world by adopting the Sustainable Development Goals (SDG) of the United Nations, in the first report it has released, emphasizes that it focuses on contributing to the sustainable growth of Turkey and preparing a better future for the environment, society and the future generations with renewable energy production.

### **"We strive for a brighter future"**

Stating that they are happy to publish the first sustainability report, İdris K peli, the CEO of Aydem Energy said: "While we offer more efficient and economical solutions for today's needs, we also develop approaches that take into account the sustainability of the needs of the resources, our industry, stakeholders, the environment and future generations. As is known, in the past months, we have joined among the signatories of the UN Global Compact, the most comprehensive sustainability platform in the world. Today, we are proud to take our efforts in this direction one step further and share our first sustainability report. In line with our vision of 'energy for life', we see it as one of our primary priorities and duties to realize, to put our signature on works which touch the real expectations that provide benefits to the lives of our people, that are sensitive to the environment and energize, vivify every moment of life. We will continue to work for a sustainable future in line with our global goals, with the strength we get from our employees, customers and stakeholders".
